through the information displayed based on the motion vector.

52. (NEW) An input unit according to claim 49, wherein the data processing unit zooms into and out of the information displayed based on the motion vector such that if the second image position is further from the recorder than the first image position, then the data processing unit zooms out of the information displayed, and if the second image position is closer to the recorder than the first image position, then the data processing unit zooms into the information displayed.

REMARKS

This Preliminary Amendment is submitted to improve the form of the specification as originally-filed. A substitute specification and marked-up copy of the original specification are enclosed. No new matter is added to these documents.

It is respectfully requested that this Preliminary Amendment be entered in the above-referenced application.

If any further fees are required in connection with the filing of this Preliminary Amendment, please charge same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
